## INSTRUCTIONS

# WEDDING COLLECTION

Thank you!

Thank you so much for your purchase and your support. Here are some quick tips to get you started on using your template on Canva and customize it.

Before you start.

Go to ,File' and ,Make a Copy'. This way you can keep this original file as a template for other projects. It's very important to do so if you want to refer back to using the original as it was.

What can I customize?

You can customize nearly everything in this template. You can change the font, the colors, the content, the images, so really everything. You can adjust this template to make it fit perfectly for your purpose.

How can I insert my image?

Firstly you have to click on ,Uploads' on the left and upload the images you want to use. Then you can insert your images by simply drag and drop them into the cartoon landscape images in this template. So simple right?

How can I save my template as a PDF?

If you want to save your template as a PDF, just click the ,download' button on the top right and choose ,PDF Standard' and ,Download'.

If you have any questions please let me know and I will get back to you as soon as possible. You can find more templates like this at my Etsy Shop: [www.itsniushaart.etsy.com](http://www.itsniushaart.etsy.com)
